

Your Best Source for Flat Film

We extrude, print and convert our flat film and lay flat poly tubing at a plant in the UK, where we manage the full process to ensure our materials meet our strict quality standards. A variety of film types and roll sizes are available, including clear or white films that can be printed up to 8 colours.

At Polyrol, we manufacture competitively priced, quality flat film, with some of the best lead times in the industry.

We even offer a more environmentally responsible oxodegradable blend!*

Our product line also includes pre-opened bags on a roll and stretch sleeves.

FLAT FILM MATERIALS AVAILABLE:

Clear Polyethylene

- A low-density polyethylene material that has great clarity to showcase products for many retail applications. It also has excellent printing characteristics for graphic-intensive applications.

Mailer Film

- Co-extruded, opaque film made from a unique blend of resins that offer superior sealing, strength and security.

Roll Sizes and Film Gauges:

- 150mm to 1250mm wide
- 35µm to 100µm thickness
- 250mm to 600mm OD with 75mm core

Colours and Styles:

- Clear, white and clear/white combo
- Plain or printed up to 8 colours, including surface or reverse printing

Film Configurations:

- Tubing with side seals
- Sheeting
- Double wound sheeting

* Our oxodegradable material will take one to five years to oxodegrade.
