

Polyrol Provides **Quality, Service & Value**

QUALITY

Polyrol is your best source for a comprehensive selection of quality pre-opened bags on a roll. We specialise in providing pre-opened poly bags that are guaranteed compatible with industry standard bagging systems. Our product line also includes stretch sleeves, flat film and lay flat tubing.

We extrude, print and convert our own materials at a plant in the UK, where we manage the full process to ensure our materials meet our strict quality standards.

SERVICE

Our team offers the expertise and support to provide you with the best flexible packaging solutions for your business. Our in-house graphic design team can help create unique package designs.

We also feature a wide-ranging inventory of stock bags and many are available for shipping in two business days.

VALUE

Our flexible materials are competitively priced and offer superior value, with some of the best lead times in the industry.

For high quality materials combined with superior service and value, look no further than Polyrol for your flexible packaging needs.

PRE-OPENED BAGS ON A ROLL

Bags:

- Width 50mm up to 400mm
- Length 75mm up to 660mm
- Thickness 35µ to 100µ
- Large sizes for wide bag applications
- Custom printed with text, graphics and bar codes
- Up to 8 colours; line, process or screen printed
- Variety of special features such as hanger and air relief holes, easy open perforations and more

Pre-Opened Bags on a Roll are available in the following core films:

Clear Polyethylene- Clear, White or Clear/White Combo

- A high-pressure low-density polyethylene material has high clarity to showcase your product for many retail applications. It also has excellent printing characteristics for graphic-intensive applications.

Anti-Static (Pink)

- A linear low density polyethylene that is amine free and designed to package non-ESD static-sensitive electrical and electronic components. This unique material protects the packaged product against a static discharge.

Black Opaque

- Durable and provides security and protection from light and particulates.

Rust Resistant

- Rust resistant and prevents the corrosion of ferrous metals, but does not alter the electrical or mechanical properties of the bagged product.

Mailer / Parcel

- Co-extruded, white opaque film made from a unique blend of resins that offer superior sealing, strength and security.

Polypropylene

- A high-clarity film that resists odor transfer and specifically designed for excellent optical properties and seal strength.

FLAT FILM:

Clear Polyethylene- Clear, White or Clear/White Combo

- Features excellent printing characteristics for graphic-intensive applications.

Mailer Parcel Film

- Co-extruded white, opaque film made from a unique blend of resins that offer superior sealing, strength and security.

We also offer a more environmentally friendly oxodegradable* blend!

STRETCH SLEEVES:

- Full 360° print coverage for better visual appearance with our seal through ink technology
- Choose from clear or white opaque film
- Printed up to 10 colours
- Line, screen and process
- Specialty and metallic inks available
- Adhesive free, no heat or glue needed and easy to apply
- 100% recyclable

** Our oxodegradable material will take one to five years to oxodegrade.*
